Catalog

U. S. Department of Agriculture

THEILMANN SEED COMPANY

CORNER SIXTEENTH AND STATE STREETS
ERIE — PENNSYLVANIA

*This catalog shows a complete assortment
of Garden Supplies, Vegetable, Field, Lawn,
and Flower Seeds.*

We herewith take pleasure in submitting to you our FORTIETH ANNUAL CATALOG for the year 1941. It will be found to contain only the best varieties of seed now grown.

PARCEL POST SHIPMENTS

Where the Catalog provides that postage be added to the remittance, include for postage as follows up to 150 miles:

| | |
|-------------------------------|--------|
| Less than 1-lb. package ----- | \$0.08 |
| 1-lb. package ----- | .10 |
| 2-lb. package ----- | .11 |
| 3-lb. package ----- | .12 |
| 4-lb. package ----- | .13 |
| 5-lb. package ----- | .14 |
| 10-lb. package ----- | .19 |
| 15-lb. package ----- | .25 |
| 20-lb. package ----- | .30 |
| 25-lb. package ----- | .37 |
| 50-lb. package ----- | .65 |
| Less than 1-pt. package ----- | .08 |
| 1-pt. package ----- | .10 |
| 1-qt. package ----- | .15 |
| ½-gal. package ----- | .20 |
| 1-gal. package ----- | .25 |

REMITTANCES—These should be sent by money order, registered letter, bank draft, or check. Amounts less than \$1 may be sent in postage stamps.

NON-WARRANTY—We give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants we sell, and will not be responsible for the crop. If the purchaser does not accept the seeds on these terms, they are to be returned at once.

WITHOUT NOTICE**

Vegetables

ASPARAGUS

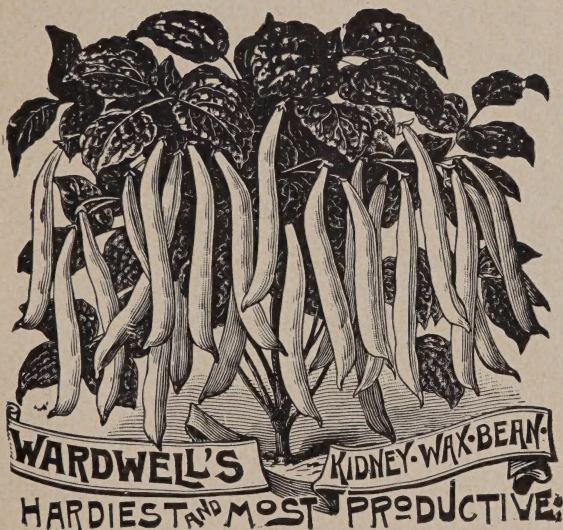

Sow early in the spring as the ground will admit of working in rows a foot apart and the plants will be in condition to set out the succeeding spring—1 ounce of seed will produce about 500 plants.

Mary Washington Asparagus — A green color. Plant early in the spring and set out the plants the following year. Oz. 10c, ¼ lb. 25c, lb. 90c.

Asparagus Roots — Dozen 20c, 100 for \$1.00, 1,000 for \$9.00.

BEANS

Beans require a light, rich soil. Plant 2 inches deep in drills 2 feet apart. Delay planting until weather becomes warm and settled, as they will not stand the least cold. One qt. will be sufficient for about 100 ft. of row.

Wax or Yellow Beans

Pt. 20c, qt. 40c, 4 qts. \$1.50, pk. \$2.50, bu. \$9.00

TOMATOES

Sow the seed in March in a hot bed. When plants are two or three inches high, transplant in pots or in another bed so they will become stocky and strong. When 5 or 6 inches high and the weather is warm and settled, transplant in open ground, setting the plants four feet apart each way. The tomato requires a sunny location and rich soil to produce handsome specimens and a good crop. 1 ounce of seed will produce about 2000 plants.

CANNAS

Choice colors—75c per dozen

TUBE ROSES—Excelsior Dwarf Pearl, 6c ea.; 60c doz.***Field Seeds*****BARLEY****Six Rowed**—Very fine Canadian grown.

Alpha Barley—Is one of the new leading sorts. Two Row Barley. Is York State grown and good yielder.

Ask for prices.

CORN

Early White Cap Dent—Is a very dependable and highly yielding early corn and a great favorite with all who have grown it on account of its good yields and certainty of a good crop even where other sorts fail.

Eight-Row Yellow.—Our famous eight-rowed yellow flint, with ears from 12 to 15 inches long, cannot be equalled; small cob, beautiful bright golden yellow grains. Ripening very early, and good yielder. Ask for prices.

Improved Leaming—This is an improvement of the old Leaming, mostly grown for silos in this section of the country; in any kind of a section it will ripen. Ask for prices.

Pride of the North—An early Dent variety, introduced several years ago, and as popular today as ever. We have the genuine variety. Ask for prices.

Red Cob Ensilage—A large white corn, with red cob, stalks especially sweet, tender and juicy; has short joints, abundance of leaves and grown to a great height; a perfect ensilage corn. Ask for prices.

Lancaster Sure Crop. Is a large yellow corn and will ripen in 100 days and can also be used as an ensilage corn. Ask for prices.

Cuban Giant Ensilage (new).—A perfect ensilage corn. Having the creamy quality of the Tuscarora Corn, and the growth and rankness of the Red Cob Ensilage Corn. Ask for prices.

Eureka Ensilage Corn—Grows the tallest and is the most leafy; will produce more good material for the silo than any other variety. Ask for prices.

Sweepstakes—This corn has been tried out through this section for a number of years with very good results; it comes earlier than Leaming and ears up well. This last season there were several farmers who saved their own seed; of course you are aware it was a good year for corn to ripen. The fodder is large, ears up well. We think it will take the place of Leaming. Ask for prices.

**The Price of Field Corn is so Uncertain that
Prices are Subject to Change**

OATS

Swedish—A large white oat, very productive one of the best varieties known. Ask for prices.

PEAS—CANADA FIELD

Canada Field Peas make a fattening and milk producing food that will grow on land that will not produce a grain crop, and at the same time improve the soil by gathering and storing nitrogen—in this respect it is almost equal to the clovers. They yield heavy crops that may be either grazed or made into hay that stock eat greedily and thrive on. They grow 4 to 5 ft. high, but can be grazed when 6 to 10 inches high.

Culture—Sow early in March, one bushel to acre and plow in 4 inches deep, after which drill in one bushel of Rust-Proof Oats to the acre to hold the vines off the ground; if sown alone sow 1½ bushel to the acre.

POTATOES

Improved Early Rose—We sell more of this variety than any other, as it is the leading early sort in almost all sections. The stock we furnish is Northern grown and has been carefully selected.

Irish Cobbler—One of the first varieties of Potatoes to be ready for market, and therefore will command a good price. The skin is creamy-white, sometimes netted, which is in indication of good quality; eyes are strong, well developed and but slightly indented. The flesh is white and of fine flavor.

Russet—A new seedling, bred from two famous varieties; its strong, compact, upright vines make large healthy foliage. Potatoes netted close together, very handsome, with eyes on the surface and very shallow, keeps well. Late Russets come highly recommended as one of the very best potatoes in existence; its flesh is fine, grain white as snow; dry and mealy. Ask for prices.

RAPE

Dwarf Essex—Grown extensively for foliage, especially for sheep. Sown in June or July, it yields a bounteous fall pasturage, on which sheep and young stock fatten with marvelous rapidity. If sown broadcast, about 5 lbs. per acre will be required; if drilled, considerable less will do. We have the true Essex Dwarf, which should not be confounded with worthless annual. Ask for price.

RYE

Spring Rye—Shorter straw than winter. Ask for price.

SOY BEANS

A valuable plant for bringing nitrogen into the soil. It is also excellent for green or dried fodder, and the seed is very rich in protein, making an excellent dairy feed when balanced with other grains. Seed should be sown during the months of May or June, using at least one bushel to the acre, when sown broadcast, or when sown in drills, 2½ feet apart, about three pecks to the acre. We handle two varieties — **WILSON** and **MANCHU**. The Wilson is a well-known variety in Pennsylvania for an early hay crop. It has fine stems, produces abundant foliage, and is also suitable for silage. The Manchu is a good all-purpose variety. Valuable for foliage or hogging down. Market price.

SUGAR CANE

Early Amber—Used largely for fodder; rich in saccharine, and the best of dairy foods.

WHEAT

Marquis Spring Wheat—One of the best varieties, good, stiff straw. Ask for prices.

Clover and Grass Seed

Timothy—The most extensively grown of all grass for hay. Ask for prices.

Alsike—Perfectly hardy does not heave in winter. Unsurpassed for bees.

Medium Red—The common variety.

Mammoth or Pea Vine Clover—A common variety of clover used extensively on poor ground and yields well.

Crimson—An annual with crimson flowers, valuable as a fertilizer; sown in late summer after early crops are taken off; will produce a heavy growth to turn under the following spring.

Alfalfa—One of the most nutritious plants grown; valuable as a dried hay or for pasture.

Grimm Alfalfa—This variety is well known and is sown because of its hardiness and productiveness.

Sweet Clover — This is a legume whose value today as a soil-improver is much appreciated. It is also used for forage. It is recommended by authorities and

farmers everywhere. Will do well in most any soil, but it requires lime and the seed should be inoculated. It may be sown either in the spring or fall. Sow about twenty pounds of seed to an acre.

Sudan Grass

A forage crop of immense value. It is strictly an annual and dies each year like millet and must be seeded again each spring. Sudan Grass grows tall, reaching a height of six to nine feet. Sow in rows 18 to 24 inches apart and cultivate like corn, or it can be drilled in with a grain drill, or sown broadcast by hand. If sown broadcast, about 20 pounds required per acre. If drilled in rows, four to eight pound of seed is sufficient.

Millet

German or Golden Millet—Will grow three to four feet high and will mature in about three months. Takes the place of hay and makes a wonderful green feed in dry seasons. Market price.

Japanese—Comes from Japan; the largest variety of all; grows from 6 to 8 feet high, yielding immense quantities of feed. Market price.

Hungarian Millet

Valuable when hay is short or to follow some early harvested crops. Sow $\frac{1}{2}$ bushel per acre.

Lawn Grass

THEILMANN'S LAWN GRASS

This is by far the best mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared by a careful blending of different grasses to produce a thick, velvety appearance so much sought after. Many of the choicest lawns in our city have been seeded down with this mixture and have proven satisfactory.

THEILMANN'S "SHADY PLACE" GRASS

We have a special lawn mixture for shady places. The grasses used in making this mixture are only those that are well adapted for growing in the shade, and as it blends well with our regular LAWN GRASS MIXTURE, it may be used on those portions of the lawn which are shaded by trees, buildings, etc.

White Clover—Valuable for lawns and pastures.

Fancy Red Top—Cleaned from chaff.

Kentucky Blue Grass (*Poa pratensis*). Thrives on a variety of soils. Valuable for lawns.

Creeping Bent—A low growing variety. Used for fine lawns. Modern golf has popularized this thickly rooting, densely cropping mass for putting greens, making a very velvety surface.

English Rye Grass (*Lolimu Perenne*). Used for quick lawns, meadows and pastures.

Red or Chewing Fescue (*Festuca Rubra*)—Excellent for sowing on sandy soil, also shady places.

Rough Stalk Meadow (*Poa Trivialis*) — Recommended for shady lawns, also a rich pasture grass.

Crested Dogtail (*Cynosurus Cristatus*) — Fine leaved grass for lawn and pasture.

Perennial Rye Grass—A fine leaved grass. An excellent green on fairways or anywhere that a quick-growing sod is needed. Ask for prices.

Fertilizers

Every gardener knows there is nothing better than **MANURE** to build up the soil, and produce big crops of fine vegetables and fruits.

Wizard Pulverized Sheep Manure—the **Weedless Fertilizer**—Supplies the humus and plant food necessary to make all plants grow to perfection.

It is the leading fertilizer and will produce thick, velvety, green lawns of lasting beauty. Apply 10 pounds to 100 square feet. Flowers and shrubbery will give a luxuriant growth of healthy green foliage and will prolong the blooming season. 2 lbs. 15c; 5 lbs. 25c; 10 lbs. 40c; 25 lbs. 60c; 50 lbs. \$1.10; 100 lbs. \$2.00.

Wizard Pulverized Cattle Manure—Is one of the best fertilizers for roses and can be used for all other plants and vegetables. 25 lbs. 60c; 50 lbs. \$1.10; 100 lbs. \$2.00

Bone Meal—Excellent for general use or mixing with potting soil, 5 lbs. 25c, 10 lbs. 40c, 25 lbs. 75c, 100 lbs. \$2.75.

Phosphate—We have a special put up for use for gardeners, which we find has no equal for truckers and gardeners. It is put up in 100-lb. sacks. Try some at \$2.00 per 100 lbs.

Nitrate of Soda—Lb. 5c, 10 lbs. 50c, 25 lbs. \$1, 100 lbs. \$3.

Sulphate of Ammonia—A nitrogenous plant stimulant; very quick in action, tending to make soil acid, increases leaf growth. Much used on lawns, which it not only feeds, but weeds are discouraged when used on lawns. Use 1 lb. to 150 square feet. Price same as Nitrate of Soda.

Aluminum Sulphate—Experiments have shown that soil acidity is required for rhododendrons, azaleas and all other evergreens. Apply at the rate of about one-half pound per square yard. 1 lb. 5c, 25 lbs. \$1.00.

Plant Food—Especially made for house plants; will start them into growth quickly. In packages 15c, 25c, 50c.

Lime—(Hydrated or Powdered). 10 lbs. 20c, 50 lbs. 50c.

Fertilizer—5-10-5. A specially blended fertilizer for growing vegetables.

Fertilizer—4-12-4—Used a great deal for lawns.

For LAWNS and GARDENS

● For greater gardening success feed everything you grow with Vigoro. It supplies all 11 elements plants require from soil. Delightful to use . . . clean, odorless, sanitary. Most economical, too!

A Product of Swift & Company

PRICES

1 lb. 10c, 5 lbs. 45c, 10 lbs. 85c, 25 lbs. \$1.50, 50 lbs. \$2.50,
100 lbs. \$4.00.

MORE THAN PAYS THE COST OF
FUMIGATING 1000 CUBIC FEET WITH
CYANOGAS G-FUMIGANT IN THE
GREENHOUSE

Adult White Flies killed by fumigation with CYANOGAS.

CYANOGAS used correctly, will not harm the tenderest plants. There is no discoloration of blooms, no burning, no clinging odor.

CYANOGAS has a stimulating effect on plant growth.. no effect on soil.

CYANOGAS is easy to use. It is simply shaken on the house walks at night. Then the house is shut until morning. There is no mixing, burning or spraying; no jars, pans, pump guns, lamps, vaporizers or other equipment needed. Fumigation over, there is no need to air out the greenhouse—hence the risk of chilling plants is eliminated. Nothing to clean up.

ANSUL DUST

Seed and soil treating Compound, prevents Damping off of Seedlings and cuttings. 3 ounces for 1 bushel oats or barley. Pound 75c.

DUBAY SEED DISINFECTANT

For all kinds of seeds, will produce a larger production of crops than when not treated.

SEMESAN FOR VEGETABLES

1/3 oz. packet 10c, 2 oz. tin 35c, 1 lb. tin \$2.25

One ounce treats 15 to 30 lbs. of seed.

SEMESAN BEL FOR SEED POTATOES

4 oz. tin 45c, 1 lb. tin \$1.50. 1 lb. treats 60 to 80 bushels of seed potatoes.

SEMESAN JR. FOR FIELD AND SWEET CORN

2 oz. packet 15c, 4 oz. tin 30c, 1 lb. tin 75c. 2 ounces per bu. Seed Corn.

CERESAN FOR GRAIN

1 lb. tin 70c, 2 ounces per bushel.

BLACK LEAF 40
KILLS APHIS—40% Nicotine

Black Leaf 40 is highly recommended by experiment stations and by spraying experts throughout the United States and the Dominion of Canada.

The standard contact insecticide for spraying vegetables, fruits, flowers, and plants to destroy aphids, thrips, leaf-hoppers, and similar "sucking" insects. Also effective for dipping purposes. Full directions with every package.

1-oz. bottle, 35c; 5-oz. can, \$1.00; 1-lb. can, \$2.10; 2-lb. can, \$3.10; 5-lb. can, \$5.85; 10-lb. can, \$10.15.

SHERWIN-WILLIAMS BEETLE-DUST

The Mexican bean beetle is the most serious insect pest of beans. To control this pest, the upper and under sides of the leaves must be dusted with a very fine powdered insecticide. Beetle-Dust is an extremely fine powdered insecticide and contains an arsenical poison and sodium fluosilicate. It controls the Mexican bean beetle and other chewing insects. 1 lb. carton, 25c; 5-lb. bag, 80c.

TERRO ANT KILLER

Will drive ants from pantries, refrigerators, plants, flowers or any other place infested with them. Terro is guaranteed to do the work or money back, 25c. Bottle, 50c; postpaid 60c.

"Economical, efficient and easy to use."
"The Complete Insecticide—Controls both chewing and sucking insects."

Kills the Mexican Bean Beetle and a host of other resistant insects, including:

Harlequin Cabbage Bug, Cucumber Beetle, Asparagus Beetle, Squash Bug, Aphis (plant lice), Leaf Hoppers, Dahlia Beetles, Rose-Chafer, Red Spider, Mealy Bug, Caterpillars, Aster Beetle, Gladiolus Thrip, White Fly, Cutworms, Sod Webworm.

When using RED ARROW it is not necessary to add soap—simply mix water. RED ARROW is highly concentrated, therefore more economical to use. For example: 2 teaspoonsful RED ARROW in 1 gal. of water (without using additional soap) makes a solution strong enough to kill the Mexican Bean Beetle, Asparagus Beetle, Rose-Chafer, and others—for most purposes 1 teaspoonful in 1 gallon of water is sufficient. Non-poisonous to humans, animals, and birds—Non-injurious to plant-tissues or soil.

TREEKOTE

A pruning and grafting compound applied cold from can, and is excellent filler for cavities in tree surgery when mixed 3 parts sand, 1 part Portland Cement and 2 parts Treekote. It may be used for wood or metal roof repairs. Also as a treatment to young fruit trees against rabbit and mice injury and as a dressing when such injury has occurred. Pint, 35c; gallon, \$1.75.

NURSERY VOLCK

EFFECTIVE, SAFE AND EASY TO USE

Ornamental shade trees, shrubs, conifers, and greenhouse plants require a great deal of care to preserve their natural beauty and vigor. Spraying with contact insecticides is the only satisfactory means of controlling the sap-sucking insects such as scales, mites, aphids, mealy bugs, white flies, etc. NURSERY VOLCK is especially adapted to nursery, greenhouse, and shade-tree spraying. It has all the effectiveness of the original Volck but is safer when applied to tender plants.

CROW-FEZ

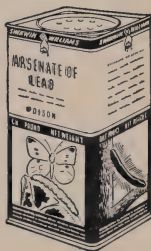

Insures Seed Corn against attacks of crows, black birds, Starlings and other corn annoying birds, also moles and woodchucks. 1 pint, 50c; ½ pint 35c.

SOUND FRUIT BRINGS PROFIT

Sherwin-Williams

DRY ARSENATE OF LEAD

You cannot afford to experiment with spray materials this year. Use one that has proven by years of use to be successful. Has been the standard of quality for years. It has maximum killing strength, yet no danger of burning and will insure you the big healthy fruit that you want. Ask us for literature and prices.

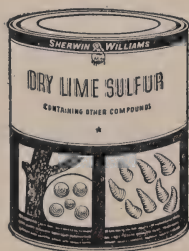

Kill the Scale before it kills your Trees

Spray in the early spring while the trees are dormant, with Sherwin-Williams

DRY LIME-SULFUR

Standard Lime-Sulfur Solution in dry powdered form

It has all the good qualities of Liquid Lime Sulfur but eliminates the bad qualities. Use Dry Lime-Sulfur in your orchard this year. It will save you time and money.

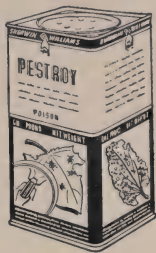

PROTECT YOUR CROPS

Not only against insects but against disease as well:

USE SHERWIN-WILLIAMS PESTROY

A combination of Arsenate of Lead and Bordeaux Mixture in dry powdered form.

This spray has the killing power of Arsenate of Lead and the fungus preventive qualities of Bordeaux Mixture. It sticks to the leaves and makes big healthy fruit. When used according to directions, a spray solution will be secured containing approximately 1 1/3 pounds of Arsenate of Lead and the standard 4 4-50 Bordeaux Mixture formula. Drop in and get descriptive literature and prices.

FUNGTROGEN. — A preventative and remedy for mildew, black-spot, and other fungous diseases. Adds vigor to the plant. Mix with 60 times its volume of water.

4 ozs. 45c; 1/2 pt. 75c; 1 pt. \$1.25.

TRI-GEN—Tri-ogen Spray Treatment gives complete protection against all diseases and insect pests. It is easily applied and also acts as a plant stimulant. A small kit \$1.50; B medium kit \$4.00; C large kit \$6.00; D estate kit \$20.00.

GROW
BETTER
ROSES

Spray with **TRI-GEN** — the Rose Garden Spray Treatment for the control of many insects and fungous pests. Also an effective stimulant which tends to promote healthy plant growth. Four sizes — \$1.50, \$4.00, \$6.00 and \$20.00.

TRI-GEN

Patents Pending

TRI-GEN FOR ROSES

FUMEOGEN—A new scientific repellant and insecticide, 50c.

MOLOGEN—Eliminates Moles in two or three days. 50c

"DOGZOFF"—Will keep dogs away from evergreens. Will not injure animals. Price 60c.

INSECTICIDES

We think we have as complete a line of spraying material for all kinds of diseases on trees, plants and destroying insects. Do not wait until too late.

LIME AND SULPHUR SOLUTION is endorsed by all the experimental stations for scale, etc., practically you are compelled to use it if you wish to save your trees. We can supply you any quantity you wish, from 1 gallon to a barrel. Get prices.

PARIS GREEN. Largely used for spraying potatoes. $\frac{1}{4}$ lb. 15c, 1 lb. 50c.

HELLEBORE. Powdered white Hellebore, excellent for currant worms. 25c pkt.

SLUG SHOT. A non-poisonous powder to be applied dry, particularly effective for potatoes and cabbage. Pkg. 20c; 5 lbs. 85c.

TOBACCO DUST. Pure tobacco ground to a fine powder. Effective in the destruction of all insect life, especially useful on cucumbers and all tender plants as it does not burn; lb. 8c; 100 lbs. \$4.00.

FISH OIL SOAP, used for washing plants, also destroy borers. Pkt. 25c.

BORDEAUX MIXTURE for black rot mildew, etc., in powdered form. Pkt. 25c and up.

SULPHUR used to prevent mildew on plants, also used for scab on potatoes. Per lb. 10c; 25 lbs. \$2.00.

GRAPE DUST, 1 lb. 40c.

ROSE-AID. Is a specially prepared dust for roses and should be applied as a dust using the sifter top on can or a hand dust gun. This treatment will control Black Spot and Mildew. ROSE-AID is also for control of rust on Asters, Hollyhocks and Carnations. Mildew on Phlox, Zinnias and Sweet Peas. Price 40c.

PARADOW—Kills the Peach Tree Borer. 40c per lb.

Sprayers

Spraying has become a necessity as these days there is hardly a thing in the plant or fruit line that is not bothered with some pest. The only way you can get rid of these pests is to spray either trees, shrubs, or plants. We carry a full line of sprayers. See our assortment.

ONE QUART GLASS SPRAYER

This is one qt. Glass Sprayer, used for spraying small fruits and vegetables and can also be used for disinfecting poultry houses. Price, 65c.

“THE MIDGET”—Price 25c

SPRAYER—For house and small plants.
Price, 15 cents

New Streamline Blizzard Copper Sprayer
1 qt. capacity; Price, \$1.50

Compressed Air Hand Sprayer

1 quart size, 75c each

BROWN'S CRYSTAL DUSTER

A new type hand Duster, with glass jar container. The volume of dust expelled is controlled by the force used in pumping. A greater volume is expelled when the holes in the agitator tube are turned directly down, so that the dust is centered about the agitator tube. This Duster is especially good for use in dusting orchards, garden truck, field crops, and poultry houses, and is especially recommended for use with Cyanogas. Capacity, 1 qt. Price \$1.25.

THE STANDARD SPRAY PUMP

Price, \$4.00. Made entirely of brass as used with Bucket Knapsack tank or barrel for spraying orchards, gardens, vineyards, white washing, disinfecting chicken houses, killing vermin on stock.

"HUDSON" SPRAYER

This Sprayer will handle Whitewash, Water, Paints, Bordeaux Mixtures, etc., perfectly. For whitewash and all heavy mixtures it is necessary to use a "W. W." cap in nozzle, which is furnished with sprayers.

These sprayers are made in galvanized steel or brass as ordered. Weight, 9 lbs. empty. All sprayers tested to 60 pounds before leaving factory.

GRAFTING WAX

This Wax can be drawn or worked to any degree of thinness required and spread on the cut or around the graft when trimming fruit or other trees or shrubbery. It will be much better to cover the cut with the **LION BRAND GRAFTING WAX**, or for grafting trees heat same just so it will run; put on with brush. Price $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; 1 lb. 45c; postage, 10c per lb.

Garden Tools

No. 4 Planet Jr. Combined Hoe, and Drill Seeder, Wheel Hoe, Cultivator and Plow

Price, complete, \$18.75; weight, 50 lbs. As Seeder only, \$14.75. Holds $2\frac{1}{2}$ Quarts of Seed.

This accurate, durable and easy-running tool sows all garden seeds from the smallest up to peas and beans in hills 4, 6, 8, 12 or 24 inches apart, or in drills at the proper thickness and depth; rolling down and marking out the next row all at one passage. No time is lost. No seed is wasted. By removing the seeder parts and substituting the tool frame, you have a first-class single wheel hoe with a set of specially hardened steel tools, the best made for hoeing, plowing, cultivating, opening furrows, hilling, etc. Makes the care of a garden a pleasure, as well as very profitable. Can be used successfully by men, women or growing boys. Pays for itself in a season and will last for years. Thousands have been sold in this and many foreign countries.

No. 12 Combined Double and Single Wheel Hoe, Cultivator and Plow

Price, \$11.50; weight, 33 lbs.

A Double and Single Wheel Hoe in One. 1 Wheel No. 17, \$7.75.

14-inch steel wheels for 1941. Straddle crops till 20 in. high, then can be worked between rows with one or two wheels. The hoes are wonderful weed killers and leave the ground almost level. The cultivator teeth are of improved design and admirable for deep work. The plows are invaluable for opening furrows for manure, etc., for covering and for plowing to or from the crop. Catalog free.

THE NATIONAL WHEELBARROW CLOVER AND GRASS SEEDER

Steel Wheel Hopper. Sows fourteen and sixteen feet. Price of Seeder, 14 feet box, \$14.75. Price of Seeder, 16 feet box, \$15.50.

NORCROSS CULTIVATOR

Hoes and Weeders

are among the most modern tools for garden and flowers. They are light, strong and cultivate closer to the plants without injuring them than any other kind of implement, leaving the soil level, loose and untrampled. Cost but little more than a common hoe—accomplish much more and better work with less labor. They cultivate the soil.

Prices, 75c and \$1.25.

RAT CORN

Shake box well before using. Mix three parts of Rat Corn and one part of bait thoroughly together adding a little water, if necessary only a few drops at most and put around in batches where troubled about a tablespoonful to a batch. If more than one application is necessary it is well to keep changing the bait. Price 25c and 50c per package.

K. R. O.—Kills rats only, not a poison, can be used with safety around the barn, poultryhouse, warehouse or any rat infested building. Price, 35c.

MICE SEED—Clean ready for use, no bait, no muss, but will rid your house of mice; better to use than traps. Packet 25c.

SURE DEATH—Kills Rats—25c.

RAT-NIP—Kills Rats—30c.

RAT BOOMS—Kills Rats—15c.

USE CARBOLA—Instead of Whitewash

Because CARBOLA will do everything that whitewash will do and at the same time will thoroughly disinfect. Carbola will increase the light in buildings, brighten up the dark corners, make them sweet smelling and sanitary, improve their appearance, and put them in shape to pass the inspection of milk companies and health authorities, all in one operation.

The dry Carbolic powder is unexcelled as a lice powder for use on poultry, cattle, horses or hogs, and is recommended to rid dogs of fleas. Use Carbola in your poultry houses, stables, dairies, creameries, cellars and outbuildings. It is endorsed by thousands of the best known and most carefully conducted poultry, dairy and breeding farms, and by many experiment stations and agricultural colleges. Prices:
